

UPCILON Introduces **LIMS** (A complete Library software)

LIMS, one of our product emerging from our ardent wish to ease the work performed by the workforce engaged in the activities of libraries. There are several responsibilities on the library management staff, namely issue and return of books, management of catalogs and member lists, charging fine, auditing the current library status i.e. the availability of requisite number of books, purchasing new books etc.

LIMS helps the librarian manage the catalogs, member lists and corresponding accounts, issue and return of books, collection of books, book demand list, library card creation and much more. **LIMS** is:

1. Ease of Use
2. Cost Effective
3. High Quality End User Support Services
4. Simple yet elegant
5. Supports Barcode Technology

LIMS is a full-featured library management system. It is Windows-based with simple point-and-click navigation; the system is easy and fun for library users and staff. The solution is designed with a consistent, intuitive interface familiar to anyone who has used Microsoft Office. User can explore the entire system with just a few mouse clicks, yet behind the simple interface lies a powerful database engine capable of maintaining millions of records.

LIMS is designed to meet the needs of all information seekers. Academic researchers can search the entire library collections like, books, magazines, research reports, Company annual reports, CD materials etc. For the librarian, this solution provides simple interfaces to catalog new books, manage users, and create reports, and control budgets & acquisitions.

The Users can search the database and find specific information. The search facility also gives information about the availability of the item, including current status of individual copies of a title and reserve status.

All the module of **LIMS** provides comprehensive collections control. Some of the features of the **LIMS** are:

- . Module is fully integrated with Cataloging module, Keep track of funds, Generate reports on orders and funds, Librarian can define the position of the item by Building, floor, No of the shelf etc.
- . It will actually help in identifying the item in the library.

LIMS permits automatic notification of overdue. Librarians can perform almost any circulation task from one screen, including:

- Issues, Returns, Reserve, Renew, Advance Booking, Reservation of Items by Users, Request to acquire new items, Collect or waive full or partial fines, Renew all items issued to a user with a simple mouse click, Issue items by hours/days/week/months, Create an unlimited number of user types, such as Librarians, Faculty, Assistants, or Students, each with different privileges.

LIMS allows librarian to track magazine subscription. Some of the key features of serials are:

- Unlimited no of copies of a given issue, Capability to search for an issue by keywords, Predict Next due date, Reader List, Bind Serials, Annual Reports, CDs, Audio & Video Cassettes etc

LIMS can save a great deal of information about users. User data can be entered manually or transferred from any student information system. Users can search the library or with few mouse clicks. Users can reserve books if they are not available.

LIMS can take care of the management of the newspaper articles, research articles etc. There is a security panel to make changes to the system at the administrator level. Some of the features of security system are:

- Administrator Password protected to make any changes, To change the name of college and library, To set the no of days to return an issued book, To set fine amount per day, To set currency conversion rate to get exact price of imported books in local currency
